Leland Stanford Junior University

WORK ELIGIBILITY

United States Citizen
Netherlands Citizen (European Union)

SUMMARY OF QUALIFICATIONS

- Full-stack software engineer in modern tech (React, Node.js)
- 5000+ hours of Computer Science & programming
- Passion for responsive, mobile-first, accessible UI
- Excellence in debugging and best practices
- Focus on teamwork including accountability & consistency
- Passion for the evolution of computers, the web, and languages

WORK EXPERIENCE

Software Eng. Fellow – General Assembly   Remote/Boston, MA
Jan. '20 – Apr. '20

I built 4 websites:

- <u>Simple Fundamentals of Programming:</u> an accessible flashcard app. Highlights: React deep dive, styled-components library, accessibility.
- <u>Pollaris Surveys:</u> create, take, and manage surveys. Highlights: responsive UI, custom backend routes with Express and Mongoose.
- <u>The Forgiveness Project(ion):</u> Create a post to forgive and come into the now! Highlights: Bootstrap, UX design, Ruby on Rails API.
- <u>Retro Tic Tac Toe client:</u> working with a 3rd-party API. Highlights: SPA philosophy, best practices, visualization of data and logical flow, focus on dependencies, vulnerabilities, documentation, and licenses.

Freelance Web Developer   Remote
Dec. '18 – Jan. '20
I assisted my client with WordPress management and Search Engine Optimization (SEO). I built a thorough, precise archive of his life's work on his website and completed an extensive Wikipedia page update.

Software Engineer – Huckabuy   Remote/Park City, UT
May '18 – Aug. '19
I was accountable for the Structured Data LD-JSON code for 75+ enterprise customers including SAP App Center, Salesforce AppExchange, Domo, Pluralsight, and SaltStack.

Field Education Instructor – Teton Science Schools   Jackson, WY
Summers '15 & '16
Instructed K-12 students in Grand Teton National Park and Yellowstone, in backpacking, the scientific method, fire & ice ecology, NOLS leadership, natural communities, orienteering, canoeing, and tracking.
